the same as filling out the 748C Form? Q#2- Is the Source Category 2 or 3 from the Original Manufacturer. shipping a Category 2 or 3 back to the original manufacturer as listed on Online reporting website in printable form for License verification records (Currently I have only been able to view their Name in list form on Credentialed website)) Would it not simplify things if the verification of the Original Manufacturer license not be required for transfer back to the Original Manufacturer? Q#4- Would it simplify things if on the Inventory form there was a tab for transferring (each checked individual source) back to the original Manufacturer for disposal OR to populate portions the 748 B Form for single or group shipments. Due to the Complexity of the rules will there be any Credentialed Radiation Security Consultants allowed to assist in guidance, implementation & for maintaining or Instructional Course for compliance and record keeping of rules?
